

THREE-PART LECTURE SERIES

Intro to AI Lecture Series

This three-part series demystifies Artificial Intelligence, offering clear explanations and practical insights for engaged adults.

01

What's All the Fuss About AI?

The foundational concepts of AI without the jargon — and how to put it to work in your day to day.

02

Real, Wrong, or Fake?

The capabilities and limits of AI, and how to critically evaluate AI-generated content — truth from deception.

03

The Future of Work

How AI is reshaping work — what it means for students, young professionals, and the people you care about.

Each session is 60 minutes and includes a dynamic presentation, live demonstrations, and an interactive Q&A. Content is tailored to the audience's interests and tech comfort level.

HOSTED BY ADI ALONI

I spent almost 20 years as a tech executive in Silicon Valley. Close enough to experience the technology first hand and see how it actually works. But I also know how fast it moves, and how easy it is to feel left behind.

So I took it upon myself to leave no one behind. I explain complex concepts in plain language, tell the stories behind them, and make them easy to use and a little fun.
